

JPL Scout 3100 DECT PTT Amplifier

User Manual

Important Safety Instructions

This Scout 3100 is very easy to use and setup. For optimal use, we still recommend that you read this user guide carefully before using the Scout 3100 for the first time.

Unpacking

Remove your Scout 3100 from its packaging and ensure you have the correct specified accessories. Please retain the packaging for use should the adapter needs to be returned for servicing or repair.

Safety

For your own safety, this product should only be used with UKCA, CE, FCC, RCM, and RoHS approved equipment. Using this adapter with non approved equipment can void this products warranty.

Environmental Notice

This adapter has been made to UKCA, CE, FCC, RCM, RoHS and WEEE standards. In the interest of recycling raw materials, please do not dispose of this adapter in the household waste at the end of its useful life. Disposal can take place at approved recycling or disposing locations in accordance with local regulations.

Warning

Ensure that all electrical connections (including extension leads and interconnections between pieces of equipment) are properly made and in accordance with the relevant manufacturers instructions.

- Do not continue to operate the equipment if you are in any doubt about it working normally, or if it is damaged in any way. Disconnect from your telephone equipment and consult your dealer.
- Do not allow electrical equipment to be exposed to rain or moisture.
- Never push anything into holes, slots or any other opening on your headset as this could result in fatal electrical shock.
- Do not open the adapter housing as doing so will void the warranty.
- Never guess or take chances with electrical equipment.
- Do not use this equipment to report a gas leak while you are in the vicinity of a gas leak.
- Telephone headsets are capable of producing high levels of sound. Prolonged exposure to high sound levels can cause damage to hearing.
- Never allow small children to play with the adapter - small parts may be a choking hazard.

JPL Scout 3100

The JPL Scout 3100 Wireless DECT PTT (Push-To-Talk) delivers reliable wireless communication and seamless PTT functionality for public safety dispatch, air traffic control, radio operations, and simulation training. Designed for environments requiring secure transmissions, the advanced DECT wireless adapter ensures top-tier protection with DECT Security Step C. Supporting both analogue and USB interfaces, the DECT PTT system offers flexible configurations for one or two independent portable devices, making it the ideal solution for mission-critical communications.

Advantages

Enhanced Security: Complies with DECT Security Step C and features 256-bit AES encryption (FIPS 140-2) to ensure secure communication in sensitive environments.

Superior Audio Quality: Delivers clear, reliable voice transmission with advanced DECT technology optimised specifically for voice communication.

Wireless Flexibility: Operates without cables, providing up to 400 ft (120 m) of range using DECT wireless technology for increased mobility and convenience.

Flexible Interface Support: Analogue and USB interfaces ensure broad compatibility with both analogue and VoIP communication systems, as well as training simulators.

Connects to:

- Analogue RJ12 female connector to dual-prong PJ7
- USB-C connectors to PC or voice communication consoles

Wireless:

- DECT 6.0 North America: 1.92~1.93 GHz
- DECT 6.0 Europe: 1.88~1.90 GHz
- Range: (outdoors line-of-sight) 400 ft / 120 m
- Security: DECT Security step C
- Encryption: Military level FIPS 140-2 listed 256-AES encryption
- Authentication: 128-bit AES

Battery:

- Battery capacity: 400 mAh
- Talk time: up to 11 hours with narrowband audio
- Extra battery with charging chamber
- Charge time: Quick charge for 2~3 hours

Receiving Frequency Response:

- User selectable option for wideband and narrowband audio
- Wideband 50 ~ 7000 Hz for G.722 Codec audio
 - Sampling frequency: 16 KHz
 - Bit rate 64 kb/s
- Narrowband 300 ~ 3,400 Hz for G.711 Codec audio
 - Sampling frequency: 8 KHz
 - 8 bits per sample
 - Bit rate 64 kb/s
 - Algorithm delay: 0.125 msec

Compatible Headsets:

- Compatible with all JPL QD type headsets - 4 pin
- Compatible with Poly QD type headset - 4 pin

Handheld Remote Trigger Unit Features:

- PTT buttons
- LED / On-Off button
- Detachable belt clip
- Receiving volume control

Base Unit Features:

- Two charging chambers
- Microphone transmit volume controls
- Status LEDs for power, battery charging, audio interface, and PTT
- Pairing button
- Analog (RJ12), and USB connection ports
- Operating temperature range: 40°F(+4°C) to 110°F(+49°C)

USB Enumeration:

- The PTT button features enumerates that depend on the customer's demands
 - Microphone open/close (secure talk)
 - Gamepad 1, open mic
 - Joystick 1, open mic

USB Enumeration (Push-to-Key):

- Mode 1 : Analog
 - For PJ-7, Lemo or other analog connectors
- Mode 2: Digital
 - For USB Secure PTT or USB Push-to-Key

What's included

Thank you for choosing the JPL Scout 3100 Wireless DECT PTT Amplifier.

DECT Base Unit

DECT Handheld Trigger

Spare Battery

RJ12 to PJ7 Cable

RJ12 to RJ12
Supervisor Cable

2 x USB-C to USB-C/A
Power Cables

USB-C Power Adapter
with multi-country attachments

Back of unit port functions:

| | |
|----------------|--|
| USB-C 1 | USB-C power can be connected to this port |
| USB-C 2 | USB-C data and power can be connected to this port |
| RJ12 ports | Both RJ12 ports can be used for PJ-7 analogue connection of supervisor cord connection |
| Volume level | Microphone volume can be controlled with 15 steps |
| Pairing switch | The pairing switch can be used for pairing the base unit with the handheld trigger |

You can power the JPL Scout 3100 by plugging one end of the USB-C to USB-C power cord into the **‘USB-1’** port and the other end into the USB-C power adapter.

You can also power the JPL Scout 3100 by connecting one end of the USB-C to USB-C power cord into the **‘USB-1’** port and the other end into your PC’s USB-C port.

When it is connected, the base station will wake up and start operation.

There are two RJ12 ports. One can be used for the RJ12-to-PJ7 cord connection and the other can be used for the RJ12-to-RJ12 supervisor cord.

Remote handheld trigger overview

Powering up the handheld trigger

There are two ways to power up the remote handheld trigger.

- 1) Press the **in-use** LED button and the in-use light will turn on.
- 2) When the remote is powered off, you can power it up by placing it in the docking cradle.

Charging the handheld trigger

Place the handheld trigger into the righthand docking cradle. When the handheld trigger is charging you will see the three battery level LED lights showing you the battery level.

Charging spare battery

SCOUT
BY JPL

To charge the spare battery place it in the lefthand cradle.

There are two battery level LED indicators.

The spare battery is fully charged when both indicator lights are on.

Spare battery
charging level

Changing batteries

To remove the battery from the handheld trigger, press the button located on the battery unit and slide the battery unit down.

The battery on the handheld trigger switch can be changed without any power disconnection.

There is a backup battery inside the handheld which allows you to keep the call live for one minute during handheld trigger battery exchange.

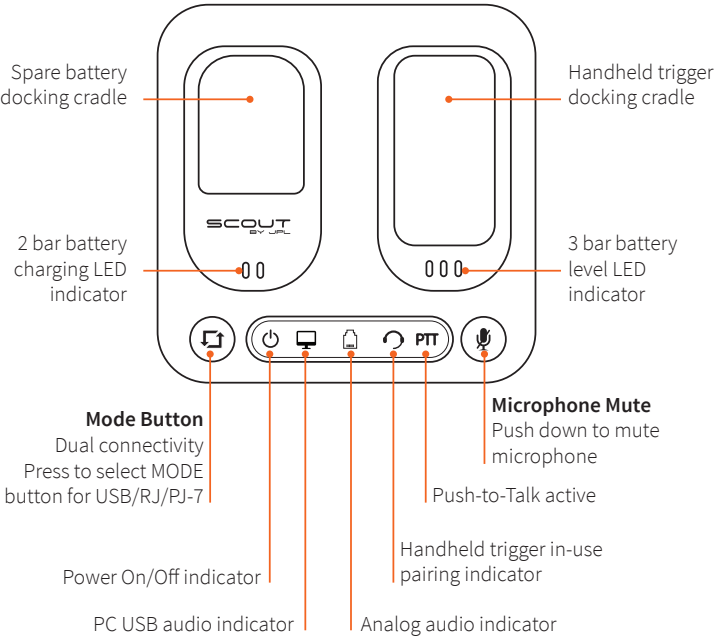

Handheld remote trigger settings

| Item | Function | Description |
|--------------------|---|--|
| Pairing | Handheld remote pairing | Press and hold the in-use button for 4 secs then release button - In-use LED blinks every second when in pairing mode - In-use LED flashes once per 3 secs if succeeded (sync mode) - In-use LED flashes 2 times per 3 secs if failed (no sync mode) |
| Power on | Power on handheld remote | Handheld remote makes an audio link when ready for use - In-use LED turns on steadily when the audio is connected - In-use LED flashes 2 times per 3 seconds when not ready |
| Power off | Power off handheld remote | Press and hold the in-use button for 8 secs then release button - The in-use LED turns on for 0.5 a second and then turns off when the button is pressed for more than 8 seconds |
| PTT | Activate the PTT button | Press the PTT button to send PTT signal to the console system or turn on the microphone sound on the USB interface when the audio is connected - In-use LED on the Remote will blink every 2 seconds whenever the PTT button is pressed - The PTT LED on the Base Station will turn on whenever the PTT button is pressed |
| Volume | Handheld remote volume | Adjust Rx volume by using volume wheel. There are 5 steps for volume |
| Audio | Connection on/off | Toggle the audio connection by using the in-use button - To disconnect the link, press and hold the the In-Use button for 4 seconds then release it |
| Other | Single beep every 20 seconds | Battery is low |
| | In-Use LED blinks once per 2 secs | Your Handheld remote is not paired to the Base Station. The in-use LED indicates an unpaired state for 30 seconds only |
| In-Use LED (Green) | Pairing status | The in-use LED blinks every second |
| | Unpaired status (No base paired) | The in-use LED blinks every 2 seconds |
| Summary | When PTT button is pressed with the audio | The in-use LED blinks every 2 seconds |
| | Audio connection status | The in-use LED turns on |
| | Sync locked status | The in-use LED flashes once per 3 seconds |
| | No sync locked status | The in-use LED flashes 2 times per 3 seconds |

Additional settings

| Function | Description | Remark |
|------------------------|---|---|
| PTT button beep on/off | When the remote is not connected to the base, press the PTT button for 4 seconds | Single beep : Beep tone on Double beep : Beep tone off |
| Reset handheld | Press and hold the in-use button during power on for 5 seconds | |

LED indication

| | |
|------------------|---|
| Power On/Off LED | When the power is on, the LED will be lit |
| PC USB audio | When this mode is selected, the LED will be lit |
| Analog LED | When this mode is selected, the LED will be lit |
| Pairing LED | When the handheld trigger is paired to the base unit, the LED will be lit |
| PTT LED (Red) | When the PTT button is pressed on the handheld, the LED will be lit |
| PTT LED (Red) | Remote handheld low battery - Blinks every second |

Battery level LED indication

| | |
|---------|--|
| Full | Green / Yellow / Red LED will be turned on |
| Mid | Yellow / Red / LED will be turned on |
| Low | Red LED will be turned on |
| Warning | Red LED will flash on and off to show very low battery level |

Operating instructions

- 1. Connect the USB-C cable to the USB-C in port at the back of the base unit
- 2. Press the *in-use* LED button on the handheld remote trigger to connect to the base unit
- 3. When the *in-use* LED is on, the DECT adapter is ready to use
- 4. Press the PTT button to activate the PTT function
- 5. Adjust the speaker and microphone volume for comfortable audio level

Base unit pairing to handheld remote

Press and hold the *pairing button* on the back of the base unit
- In-Use LED blinks every 0.5 sec when in pairing mode

Functions

| | |
|-----------------|---|
| Mode Button | When the <i>mode button</i> is pressed, the mode is changed from analog to USB and vice versa |
| Microphone Mute | When the <i>microphone mute button</i> is pressed, the microphone is muted. Press again to unmute |

Additional settings

| Function | Description | Remark |
|------------------|--|---|
| Side tone on/off | When the remote is connected to the base, press the <i>mute button</i> for 4 seconds | Single beep : Side tone enabled Double beep : Side tone disabled |
| Reset base | Press and hold the <i>mic volume up key</i> during power on for 5 seconds | |

On the bottom of the base unit there are 4 pole DIP switches:

| DIP Switch | Default (On)  | Off  |
|------------|--|---|
| 1 | Mic. PTT Active | Gamepad 1 / Open mic |
| 2 | Low Rx Volume | High Rx Volume |
| 3 | Mode button disabled | Mode button enabled |
| 4 | Wideband Audio | Narrowband Audio |

For a DIP switch change to take effect, please power the base unit on and off.

Scout 3100 Spare Battery
SKU: 575-406-3103

JPL Scout Belt Clip
SKU: 575-406-101

FCC Caution: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

Please contact your local JPL representative for help with further information relating to the JPL Scout 3100
